

# Digital Shadows Joint Solution Brief

CYBER THREAT INTELLIGENCE

## Joint Solution Overview

After stringent testing and customer feedback, deepwatch has chosen Digital Shadows to enhance its Managed Detection & Response (MDR) and Managed Endpoint Detection & Response (MEDR) services.

Digital Shadows enables deepwatch to enhance its MDR & MEDR service by utilizing deep and dark web cyber threat intelligence (CTI) to protect and defend customer networks. It is fully integrated with our Cloud SecOps Platform.

deepwatch begins each customer onboarding by collecting a comprehensive list of customer domains, IP addresses, high-value target (HVT) individual email addresses, internal project names, and other key terms. This information is used by deepwatch to establish automated workflows in its SOAR platform to continuously hunt for deep/dark web exposure. The net result is that customers receive automated, highly tuned alerts on their deep/dark web exposure, support takedown actions, and rich context to support incident response when applicable.

## deepwatch Digital Shadows Use Case Overview

deepwatch has built manual and automated workflows designed to reduce each customer's deep/dark web cyber threat exposure. Fueled by Digital Shadows CTI, deepwatch is able to proactively:

- ✔ Detect and alert the customer to typosquatting activities so that customers can initiate takedown actions
- ✔ Monitor IP addresses and domains for each customer and continuously hunt for dark web compromises
- ✔ Keep track of each customer's brand risks, such as spoof social media profiles, to safeguard company reputation
- ✔ Utilize customer provided HVT list to continuously hunt for leaked credentials across the deep/dark web and PasteBin
- ✔ Detect, alert, and provide rich context on data leaks so that the customer's IR and legal teams can take appropriate action

## JOINT SOLUTION BENEFITS

- ✔ Deep/dark web monitoring as a service
- ✔ Detection and alerting on credential theft and IP theft
- ✔ Delivery of rich context to resolve deep/dark web exposure
- ✔ Reduced cyber risk exposure

## ABOUT DEEPWATCH

deepwatch delivers data-driven managed security services while extending customers' cybersecurity teams and proactively advancing their SecOps maturity. Powered by our innovative cloud platform, deepwatch is trusted by leading global organizations to provide 24/7/365 managed security services.
