

DATA SHEET

Managed Detection and Response

Intelligence-driven, advanced
Managed Detection and Response
for the cyber resilient enterprise.

OVERVIEW

As the threat landscape continues to evolve and grow in complexity, securing the enterprise is harder than ever. Traditionally, defending against relentless attackers required specialized expertise, multiple costly technology investments, and constant vigilance.

Deepwatch Managed Detection and Response (MDR) operates as an extension of your cybersecurity team, providing 24/7/365 comprehensive security management capabilities in partnership with Deepwatch security experts.

Our hybrid SecOps model (people + technology) ensures unrivaled knowledge of your environment, unparalleled visibility across your attack surface, precision response to threats, and the best return on your security investments for enhanced cyber resilience.

ADVANTAGE

The Deepwatch Security Platform enables our managed detection and response services by incorporating advanced capabilities including curated threat intelligence, malware analysis, and contextual threat analytics through integrations with best-in-class technologies, security experts, and a dynamic, user-friendly interface.

Deepwatch Managed Detection and Response aligns with industry regulations including HIPAA, HITECH, PCI DSS, SOX, and GDPR.

BENEFITS OF MDR ENTERPRISE

Fast, Precision Response

- Advanced threat analytics provide low-volume, high-fidelity alerts
- Continuous threat hunting to detect evasive threats
- Rapid response to minimize impact

Extend your security team with Deepwatch experts

- Managed by a squad of experts that understand your security technology
- Deepwatch experts free your internal team to focus on critical business objectives
- Improve work-life balance of your in-house security team

Experience exceptional ROI

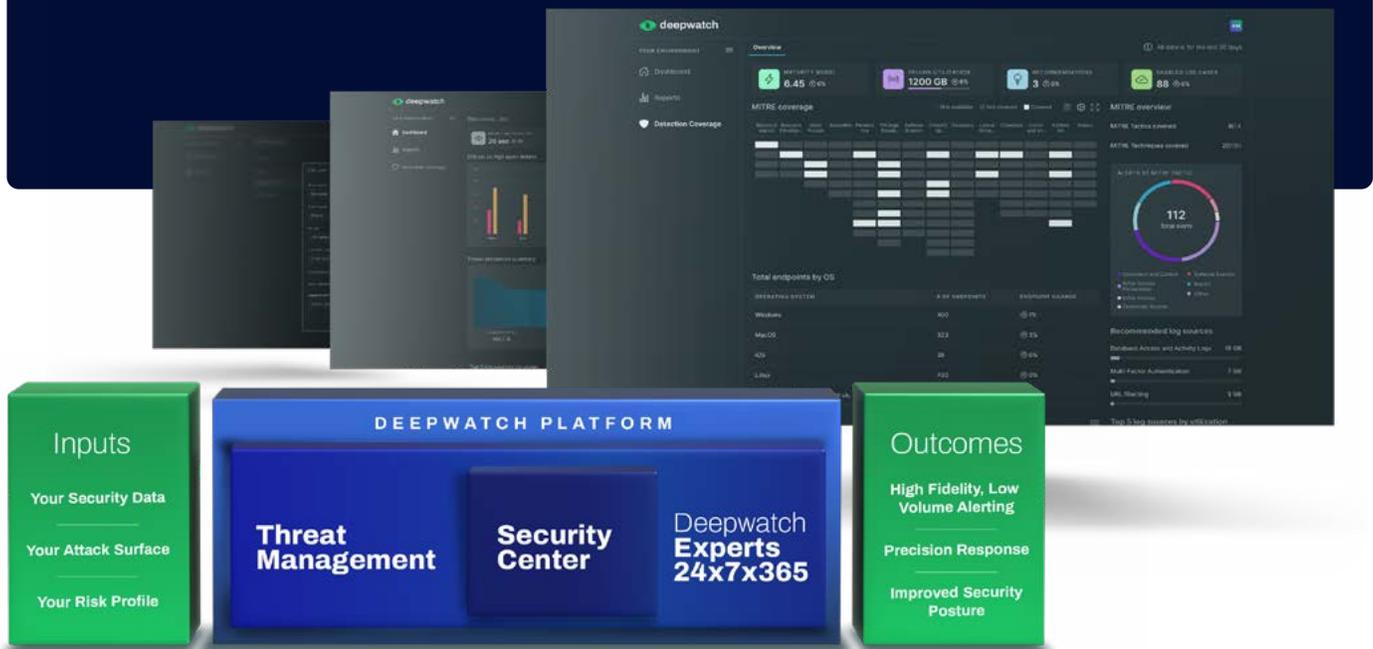

- Clear savings from outsourcing versus building and managing an in-house SOC
- Optimize your existing security tech stack
- As much as 400% ROI on security investments

Tailored for your business

- Patented Deepwatch Security Index drives the evolution of your unique security program
- Technology and processes that are continuously tuned to specific risk profiles
- Deepwatch experts help establish a blueprint for continuous improvement

DEEPWATCH EXPERTS IN SECURITY

Deepwatch pioneered a new model in the managed security space with the introduction of the Squad model. For each customer, we assign a named group of analysts, detection engineers, and threat hunters led by a Squad Leader and Customer Success Manager. This team becomes an invaluable extension of your security team and program.
