deepwatch + Qualys

deepwatch and Qualys Joint Solution Brief

CYBER THREAT INTELLIGENCE

Joint Solution Overview

After vigorous testing and customer feedback deepwatch has chosen Qualys to enhance its Vulnerability Management (VM) service delivery.

The deepwatch Vulnerability Management service provides the people and processes necessary for Qualys' technology to achieve maximum value for mutual customers.

Integrated into our Cloud SecOps Platform, Qualys enables deepwatch to enhance their Vulnerability Management service by giving deepwatch the ability to accurately identify, investigate, and prioritize vulnerabilities.

JOINT SOLUTION BENEFITS

- ✅ Accurate scans with clear result descriptions.

- ✅ Defensible scan results to ensure close alignment of security and infrastructure teams.

- ✅ Actual network asset discovery and issue pinpoint capabilities for leading patch guidance.

deepwatch Qualys Use Case Overview

deepwatch builds and manages VM programs for its customers established on the use of Qualys technologies. Armed with Qualys, deepwatch is able to ensure that customers have the right information at the right time to keep devices and systems up to date, so that threat actors cannot utilize vulnerabilities for nefarious purposes.

- ✅ **Full Vulnerability Management Program Design and Management** Fueled by Qualys technology, deepwatch manages VM programs for our customers. Qualys scans allow deepwatch to provide accurate and actionable information to properly manage patching activities based on risk and criticality.

- ✅ **Complete Configuration Management** Armed with Qualys, deepwatch is able to make sure customers are making the right changes to systems to secure them and harden them, based on industry best practices. These include TLS, SSL, Certificates, and more.

- ✅ **Pinpoint and Repair Improper Deployed Technologies** With Qualys, deepwatch is able to pinpoint all actual network assets, uncover flaws in how they were deployed, and offer a deep technical explanation of how to repair any fallacies, patch vulnerabilities, and fortify the network asset.

- ✅ **Rogue Software or Devices Detection** Utilizing Qualys scan results, deepwatch is able to alert customer security teams to potential rogue software or devices installed or operating on the network. Customers can quickly investigate, remove, or authorize unwanted or previously unauthorized software on the network, to close potential cyber threat actor attack vectors.
